ABOUT ME

I am a double **cum laude graduate**, having recently obtained an honors degree in Information Systems with distinction from the University of Johannesburg. I am a passionate Software Development Engineer and firmly believe in the transformative power of code to tackle real-world challenges. My journey in the realm of technology has been diverse, encompassing a broad spectrum of technical skills, including web development, database design, machine learning, project management, cybersecurity, and data analysis. I've amassed over three years of hands-on experience.

Currently, I am a student at BMW in Launch, Change Control, focusing on digitization and innovation. This expertise not only spans application and system development but also extends to actively sharing knowledge through tutoring in university. I approach challenges with a creative mindset, emphasizing time management, attention to detail, and adaptability as integral components of my work ethic. Driven by the belief that technology serves as a catalyst for positive change, I'm committed to leverage my skills and experience to innovate and create impactful solutions in the ever-evolving landscape of technology.

SKILLS

- ✓ Programming OOP
- ✓ Database Design
- ✓ Machine Learning
- ✓ Web Development
- ✓ IT Project Management
- ✓ APIs
- ✓ Data Analytics
